

Date	29 June 2026
TeamID	
ProjectName	Voice-Based Concept Understanding Analyser (Complete Integrated System)
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	TeamMember	Idea / Suggestion	Category	Group No.
1	Ramya Kommuri	Develop an AI-powered speech transcription module using OpenAI Whisper to accurately convert users' spoken explanations into text.	Speech Recognition + AI	1
2	Apram Kaur	Implement semantic similarity evaluation using Sentence-BERT to compare the user's explanation .	NLP + AI	2
3	Murali Manohar	Design an audio analysis module to extract speech features such as pause ratio, RMS energy, and filler word usage for evaluating fluency and confidence.	Audio Signal Processing	3
4	Ujjwal Kumar	Build an interactive Streamlit dashboard with automated PDF report generation to present transcripts, evaluation scores, waveform visualization, and downloadable performance reports.	Web Application Development + Reporting	1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Voice-Based Concept Understanding Analyser (Complete Integrated System)	High	High	1	Yes
2	AI-Based Speech-to-Text Transcription using Whisper	High	High	2	No
