ProjectName	Voice Based Concept Understanding Analyser
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

EMPATHY MAP – VOICE-BASED CONCEPT UNDERSTANDING ANALYSER

USER / CUSTOMER: Student / Learner (preparing for interviews, exams, presentations, or assessments)

SAY

- “I think I understand the topic, but I’m not sure if I explained it correctly.”
- “I wish someone could instantly tell me where I went wrong.”
- “I keep using filler words like ‘um’ and ‘uh’.”
- “Getting personalized feedback would really help me improve.”

THINK

- Did I explain the concept completely?
- Did I miss any important points?
- Am I speaking clearly and confidently?
- Will my explanation impress my interviewer or teacher?
- How can I improve my conceptual understanding and communication skills?

DO

- Records or uploads audio explanations of concepts.
- Practices topics repeatedly for interviews, presentations, or exams.
- Reviews transcripts, similarity scores, and feedback.
- Works on weak areas and improves explanations.
- Uses AI-generated reports to track progress over time.

FEEL

- Uncertain about the accuracy of their understanding.
- Nervous before interviews or presentations.
- Frustrated when unsure about mistakes in explanation.
- Motivated to improve and build strong concepts.
- Confident and satisfied after receiving objective feedback and seeing progress.
